▲TRENDS.EARTH was produced as part of the project “Enabling the use of global data sources to assess and monitor land degradation at multiple scales”, funded by the Global Environment Facility.

CONTACTING THE TEAM

Contact the [Trends.Earth](#) team with any comments or suggestions. If you have specific bugs to report or improvements to the tool that you would like to suggest, you can also submit them in the [issue tracker on Github](#) for [▲TRENDS.EARTH](#).

AUTHORS

The Land Degradation Monitoring Project is a partnership of Conservation International, Lund University, and the National Aeronautics and Space Administration (NASA), and is funded by the Global Environment Facility (GEF).

Contributors to the documentation and to **▲TRENDS.EARTH** include Yengoh Genesis, Lennart Olsson, Mariano Gonzalez-Roglich, Monica Noon, Tristan Schnader, Anna Tengberg, and Alex Zvoleff.

▲TRENDS.EARTH uses [Google Earth Engine](#) to compute indicators in the cloud.

Google Earth Engine

The **Tools4LDN** Project is a partnership of Conservation International, University of Bern, University of Colorado in partnership with USDA and USAID, University of California - Santa Barbara in partnership with University of North Carolina - Wilmington and Brown University and is funded by the Global Environment Facility (GEF).

Contributors to the documentation and to **▲TRENDS.EARTH** include Gabriel Daldegan, Mariano Gonzalez-Roglich, Monica Noon, and Alex Zvoleff in partnership with Jeff Herrick, Tatenda Lemann, Hanspeter Liniger, David Lopez-Carr, Kevin Mwenda, Jason Neff, George Peacock, Narcisca Pricope, Sanna Sokolow, and Ingrid Teich.

ACKNOWLEDGEMENTS

The feedback provided by early users of **▲TRENDS.EARTH** and by the participants in the webinars and workshops held by the GEF Land Degradation Monitoring Project have been critical to the development of the tool.

Neil Sims, Sasha Alexander, Renato Cumani, and Sara Minelli provided input on the implementation of the SDG 15.3 and LDN indicators in **▲TRENDS.EARTH**, on the structure of the tool, and on the UNCCD reporting process, and also provided early input and testing of the tool.

The project acknowledges the participants of the workshop held in Morogoro, Tanzania in October, 2017 for sharing their feedback and suggestions on the tool: Jones Agwata, Col. Papa Assane Ndiour, Lt. Fendama Baldé, Papa Nékhou Diagne, Abdoul Aziz Diouf, Richard Alphonse Giliba, Moses Isabirye, Vettes Kalema, Joseph Kihale, Prof. D.N. Kimaro, James Lwasa, Paulo Mandela, Modou Moustapha Sarr, Joseph Mutyaba, Stephen Muwaya, Joseph Mwalugelo, Prof. Majaliwa Mwanjalolo, Edson Aspon Mwijage, Jerome Nchimbi, Elibariki Ngowi, Tabby Njunge, Daniel Nkondola, Blaise Okinyi, Joseph Opio, Rozalia Rwegasira, Ndeye Kany Sarr, Mamadou Adama Sarr, Edward Senyonjo, Olipa Simon, Samba Sow, Felly Mugizi Tusiime and John Wasige.

CITATION

If you wish to cite ▲TRENDS.EARTH, please use the following citation:

7.2 Academic dissertations

- Mahlaba, B., 2022. The assessment of degradation state in Ecological Infrastructure and prioritisation for rehabilitation and drought mitigation in the Tsitsa River Catchment (Masters dissertation, Rhodes University).
- Owuor, G.O., 2021. Monitoring Land Degradation Neutrality using Geospatial Techniques in Support of Sustainable Land Management: A Case Study of Narok County (Doctoral dissertation, University of Nairobi).

7.3 Other resources

Print documentation from the Trends.Earth project (including fact sheets, reports, and other materials) is listed below.

7.3.1 Reports

- A Review of Publicly Available Geospatial Datasets and Indicators In Support of Land Degradation Monitoring
- A Review of Publicly Available Geospatial Datasets and Indicators in Support of Drought Monitoring
- A Review of Publicly Available Geospatial Datasets and Indicators in Support of UNCCD Strategic Objective (SO) 2: To Improve Living Conditions of Populations Affected by Desertification, Land Degradation, and Drought
- Trends in Population Exposure to Land Degradation - Methodological note
- Arnold S., Jun C., Olav E. 2019. Global and Complementary (Non-authoritative) Geospatial Data for SDGs: Role and Utilisation. Report produced jointly by the Task Team on Global Data and Task Team on Alternative Data Sources by the Working Group on Geospatial Information of the Inter-agency and Expert Group on Sustainable Development Goal Indicators (IAEG-SDGs).
- Using Spectral Vegetation Indices to Measure Gross Primary Productivity as an Indicator of Land Degradation
- Evaluation of approaches for incorporating higher-resolution data for disaggregation or targeted analysis
- Disentangling the effects of climate and land use on land degradation
- Monitoring and assessing land degradation to support sustainable development
- (French) Suivre et évaluer la dégradation des terres pour soutenir le développement durable

7.3.2 Fact sheets

- Conceptual Fact Sheet for Trends.Earth
- Technical Fact Sheet for Trends.Earth
